Summary

Efficient problem solver with a wide array of technical abilities and known programming languages. Full-stack developer, with prior experience working with operating systems, machine learning, and technical/business writing.

Skills

- Agile, Waterfall, DevOps - SDLC
- Attention to detail
- Troubleshooting
- Problem solving
- Computer Skills (Linux/CLI)
- Writing (Technical and Business)
- Graphics (OpenGL, GLSL)
- Parallel Processing (OpenMP, OpenCL)
- Software development (C, C++, C#, Python, Assembly, Raku, Racket, Prolog)
- Mobile development (Kotlin, Android Studio)
- Web development (JavaScript, React, Handlebars, Express, HTML, CSS)
- Database management (SQL, MongoDB)
- Scripting (Bash, Python, Ruby)

Professional Experience

AI Software Engineer (Contract), 10/2025 - Present

DataAnnotation - Remote

- Create 'gold-standard' solutions for high-complexity coding problems, specifically targeting areas where current models often struggle.
- Audit AI-generated code and responses for logic, efficiency, and efficacy across multiple languages.
- Perform adversarial testing to produce and document model failures in specialized domains, including logic, physics/mathematics, and computer science.
- Contribute to RLHF (Reinforcement Learning from Human Feedback) pipelines through in-depth performance reviews of LLM responses.

Education and Training

Graduated 09/2025 Oregon State University - Corvallis

Bachelor of Science Computer Science

- 3.68 GPA
- [Fall, Winter, Spring, 2020-2021] - Honor Roll
- [Fall, Winter, 2021-2022] - Honor Roll
- [Winter, Spring, Summer, 2025] - Honor Roll
- Finley Academic Excellence Scholarship Recipient
- ML-Breakout, Capstone Project: A re-imagination of classic arcade game, Atari Breakout, with the addition of a Machine Learning Agent to function as a player to introduce a Versus mode.
- Notable Projects: MIT JOS Lab, DVWA, Arduino/DE-10 Lite Guitar Hero, USART Infrared Robot, Full Stack Mern App (SPA), GameShop Database and Website, Rock Paper Scissors Game, OTP Generator with Google Authenticator
- Additional Coursework in Digital Logic Design, Electrical Fundamentals, Differential Equations, Mobile Software Development, Parallel Programming, Computer Org. and Assembly Lang., Technical Writing, Writing in Business

Additional Languages

Spanish (Intermediate)

Activities + Hobbies

- Tabletop games, ranging from social card games to complex strategy games that require intense resource management, optimization, and long-term planning. (Betrayal, Above and Below, Agricola, Puerto Rico, Red Dragon Inn)
